

WEATHERPROOFING ADVISORS LIMITED

WEATHERPROOFING ACADEMY - INSTITUTE OF ROOFING PROGRAMME ROOFING TRAINING FOR ROOFING PEOPLE BY ROOFING PEOPLE

Most roofing companies do not have the capacity or numbers of trainees to make in-house training worthwhile and this can be detrimental to their future especially when you need to invest in future business managers. Our industry needs competent people who are qualified technically but we also need competent and qualified leaders for the roofing industry in the future.

Our key objectives are to leave a legacy of competence within the roofing and construction industry which is based upon the transference of knowledge and best practice. This knowledge exists in the capacity of our senior people who have developed and honed this knowledge over many years of continuous improvement within our industry.

This knowledge aligned with professional development of courses and programmes aimed specifically to meet industry and your unique requirements allow us to work with you and your people to successfully transfer this competence.

Competence is best described as the amalgamation of Knowledge, Skills and Attitudes; Weatherproofing Academy excels in incorporating these key ingredients in all courses and programmes.

Institute of Roofing Management & Technician Programme

The programme is aimed at supporting your personal development relating to the principles of roofing and management. It will be an active learning process which will revolve around your own style, needs and personal objectives. It is intended to be a challenging, enlightening and participative process.

All that is required of you is an open mind, the motivation to learn, the willingness to challenge yourself and others, and an ability to transfer your learning back to your team and workplace. For the event to work well, it is important that you are prepared to be as honest as possible about yourself and your personal strengths and limitations. As a participant it will be you who will drive the process and you will therefore be accountable for the results. The facilitators will chair the process, provide vehicles for learning, and help keep you focused on the outcomes.

The Academy will organise all events including administration, venue, refreshments and lunches, all course materials and your eventual examinations. We will provide you with access to our facilitators outside of the programme to allow you to discuss any issues relating to your learning and development.

Facilitators

You will find our facilitators to be competent, experienced and practicing senior people from within the roofing industry. All of them are professionally qualified with many of them being Fellows of the IOR.

Accreditations

Weatherproofing Advisors are accredited to ISO 9001: 2000, ISO 14001:2004, OHSAS 18001 and amongst other prestigious recognitions we have been recognized as an Investor In People for the 4th time. A full list of accreditations are attached.

Action Plan

Institute of Roofing Programmes will be recommenced in Spring 2010 at our Rainford, St Helena office and you can find out more information by contacting me on 07775 537964 or alternatively, if you have eight or more participants, then we can customize the programme to your needs including delivery at your premises. We also run a wide range of management and technical training events which can also be customized. Please contact me for further details.

The Academy looks forward to discussing your precise requirements and working with you to provide solutions.
