

# Project Profile

**Site Name: Bolton Street Site, Liverpool**

Roofing System: High Performance Liquid Coating System

## The Problem

The pitched tiled roof to the student accommodation was severely dilapidated through vandalism, with symptoms including widespread blistering to the flat roof and physical holes in the pitched roof.

The product needed to be robust to withstand items being thrown onto it from height. The client wanted a product to offer long term sustainability to their building premises.

## The Solution

Due to the sensitive nature of the site together with the working logistics of a busy main street in the city centre of Liverpool, a cold applied liquid polyurethane coating system was specified for the refurbishment of these roof areas, together with the installation of Ecotherm insulation boards to the flat roof area.

Weatherproofing Advisors also incorporated rainwater gulleys to their installation scheme to maximise water egress from the flat roof area.

## The Benefits

The product installed is robust, durable and carries a zero fire rating.

### Service Centres Nationwide:

#### Blantyre

Advisor House  
West Avenue  
Blantyre Industrial Estate  
Blantyre  
G72 0UZ

Tel: 01698 826928  
Fax: 01698 824616

#### Newcastle

Advisor House  
Archer Street  
Rosehill, Wallsend  
Newcastle
