

# Project Profile

## Leyland Trucks

Roofing System: Strip & Overlay Built-up Felt Membrane

**WEATHERPROOFING ADVISORS LIMITED**

### The Problem

Last year Weatherproofing Advisors undertook what was probably the biggest roofing contract in the UK. It was a challenge of monumental proportions awash with logistical and technical challenges. Production could not be interfered with. Leyland's world-class trucks had to continue to roll off the production line at a rate of one every seven minutes.

### The Solution

Leyland Trucks utilised WPA's specialist RoofPlan Infra-Red survey and leak detection service to determine the true condition of the roof prior to commencement. The resulting diagnostics helped the WPA/Leyland team define the most effective choice of waterproofing system assuring the required longevity, speed of installation and substantial cost savings.

### The Benefits

Leyland personnel recognised the value of working with a specialist contractor. WPA's inception to completion approach included, all aspects of design and survey diagnostics, delivery and loading logistics, through life costing and supply chain management. With primary objectives agreed, namely; safety, through life value and non-interference with production, the Leyland and WPA team worked together to predict problems, face challenges and implement agreed proposals.

Service Centres Nationwide:

#### Blantyre

Advisor House  
West Avenue  
Blantyre Industrial Estate  
Blantyre G72 0UZ
